# FullCoverage for MyReserve

## Approved Inverters for claiming Full Coverage Insurance

- MyReserve works with any standard - string inverter.
- A laboratory-free examination of the inverter used is only necessary for the activation of Full Coverage
- Note the technical design parameters of MyReserve

1) all StecaGrid 3-phase inverters of the coolcept<sup>3)</sup> series must follow the software version: HMI13\_2.26.0 - PU\_10.9.0 - ENS\_2.32.0\_PAR\_23.0.10

2) OptiTrac Global Peak MPP tracking must be switched off

3) older generation

4) Dynamic Peak Management must be switched off
